

DEar FCC,

I writing to ask you to reject the NAB's Petition 04-160. I love my XM Radio and instant traffic and weather channels. Unlike local free radio stations, which only tell you about problems during ruah hours, XM tells you all day long. I commute trthrough Dallas everyday and problems don't just happen at this times. They happen all day long and it;s nice to know in advance so I can avoid them and waste half my day waiting. I find it an extremely valuable service which I pay for through my monthly subscription. To be honest,I haven't listened to regular radio since October 2002 because of the lack of good programming and way too many commercials. Please reject the proposed petition by the NAB.

Sincerely,

Denise Schopfer
